

Flower Shop Application

- Documentatie-

1. Structura proiectului

Proiectul este alcatuit din doua parti (proiecte):

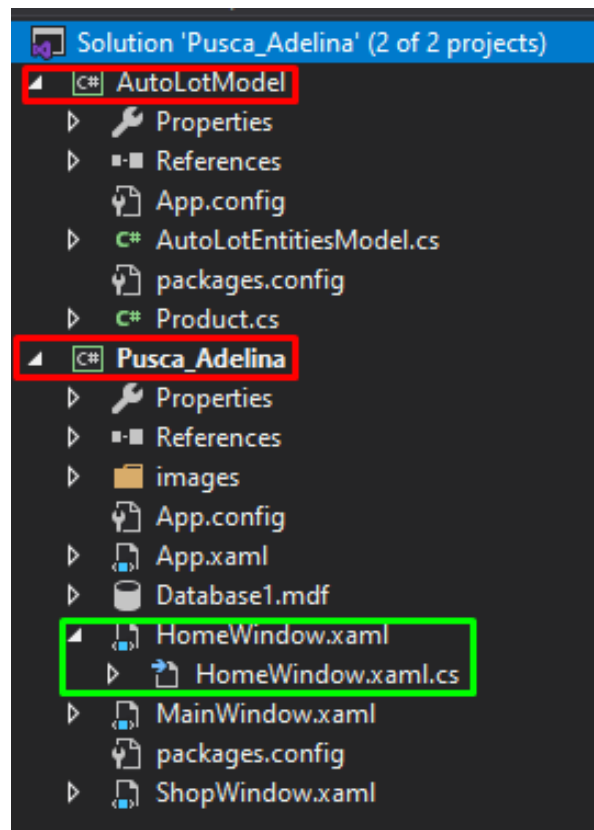

- **AutoLotModel:** Configurarea bazei de date
- **Pusca_Adelina:** Contine proiectul efectiv (interfata grafica a aplicatiei impreuna cu logica acesteia) si conexiunea la baza de date.

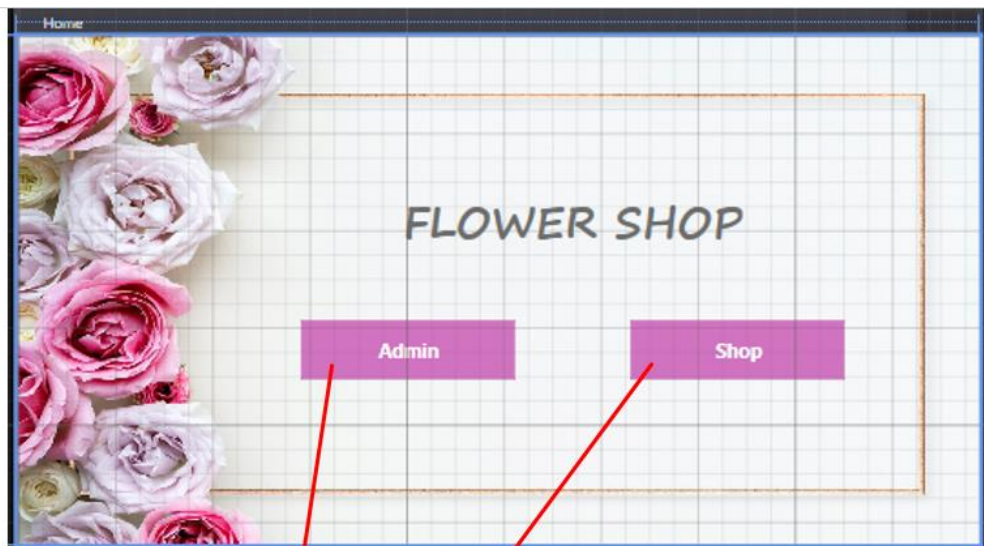

Structura unei pagini din interfata grafica (ex: pagina de home).

HomeWindow.xaml contine elementele de interafta grafica (ex: butoane, tabele etc)

HomeWindow.xaml.cs contine logica pentru elementele din interfata grafica (ce fac cand este apasat un buton)

Obs: Analog pentru ShopWindow (fereastra pentru utilizator) si MainWindow (fereastra administratorului)

```
17  /// <summary>
18  /// Interaction logic for HomeWindow.xaml
19  /// </summary>
20  public partial class HomeWindow : Window
21  {
22
23      public HomeWindow()
24      {
25          InitializeComponent();
26      }
27
28      private void adminBtn_Click(object sender, RoutedEventArgs e)
29      {
30          Mainwindow administratorWindow = new Mainwindow();
31          this.Hide();
32          administratorWindow.Show();
33      }
34
35      private void shopBtn_Click(object sender, RoutedEventArgs e)
36      {
37          ShopWindow shopWindow = new ShopWindow();
38          this.Hide();
39          shopWindow.Show();
40      }
41  }
42
43
44
```

Ce trebuie sa fac cand este apasat butonul Admin

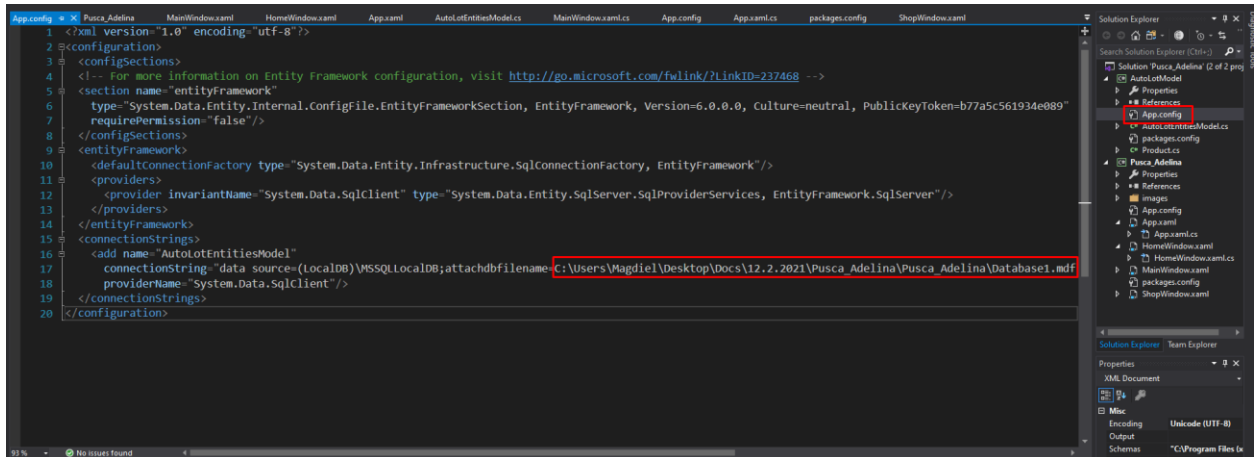

Inchid fereastra curenta si afisez fereastra administratorului

Ce trebuie sa fac cand este apasat butonul Shop

Inchid fereastra curenta si afisez fereastra magazinului

2. Configurare proiect

Din AutoLotModel → App.config se modifica calea catre baza de date cu noua cale*.

*Baza de date se gaseste sub directorul Pusca_Adelina → Pusca_Adelina → Database1.mdf

Docs > 12.2.2021 > Pusca_Adelina > Pusca_Adelina >					Search Pusca_Adelina

! Aceeasi cale trebuie schimbata si in fisierul App.config din proiectul Pusca_Adelina → App.config

Enjoy! 😊
